

## *Uranus: Limitless Love and Light*

Francis X Caulfield

First of all, thanks to all who emailed me regarding previous Stellar Message. Your encouraging words have inspired me to write in the same vein and hopefully continue shed some light on the explosive and dangerous state of affairs dominating current world events. This Stellar Message will focus on Uranus in Pisces. As with the last Stellar Message, with its focus on Pluto in Sagittarius, we will look at both the disowned, negative out-picturing of Uranus in Pisces, as well as its highest, most authentic expression. Let's first paint a picture of what is going on in Iraq, Iran, Israel and the Middle East, as that area continues to dominate national and international politics.

To begin, Pisces rules the geographic region of the Middle East. Pisces, along with Sagittarius, also rules religions, specifically Judaism, Christianity and Islam, all of which arose from the Middle East. The Christian symbol of the fish is shared by and derived from the sign of Pisces. In its negative manifestation, Pisces also rules self-deception and confusion, although the deception is not necessarily intentional or conscious. Like Sagittarius, Pisces operates through belief and faith. Neither sign is considered to be logical or rational.

Among other things, Uranus symbolizes revolution, extreme and rebellious behavior. Uranus was discovered around the time of the American and French Revolutions and was prominent during the 60's. It also signifies modern technology such as lasers, computers, advance communication systems as well as explosive devices as in Uranium bombs. Put the two together and you have the current dilemma in the Middle East. It is a clash between the old Piscean world, dominated by religious viewpoints and the new world under the sway of the destructive use of Uranian technology and rebellious and revolutionary attitudes.

Since Sagittarius and Pisces are both ruled by Jupiter, the latter's return to its own sign of Sagittarius in December '06, wherein it is promoted in authenticity and strength, can only be seen as a good omen for any affairs under the sway of Jupiter, Sagittarius, Pisces and any planets located in those signs, most notably Pluto and Uranus. Let's look more closely at Uranus in Pisces from a higher perspective, one that will become increasingly influential during the next year.

For those of us who are not tied into the destructive karma that has pitted these Piscean religions against one another for centuries, another outcome is possible and is

already underway. In short this is the emergence of the Christ Consciousness. Uranus in Pisces, from a higher perspective, symbolizes the radical awakening of vision and spirituality. Uranus rules the activation of the Light Body or the qualities and capacities of Limitless Love and Light. It does this through quickening the nervous system. Unfortunately, for any people or country not able to assimilate or accommodate this radical transformation of function and of vision, the negative consequence of this quickening is the sudden outburst of violent behavior. As the saying goes, *When the light hits, the dark gets tough.*

The world is currently being divided into two camps or ways of being in the world. In the midst of the destruction of the old and outworn belief systems is the emergence of a new world with Limitless Love and Light as the centerpiece of personal and planetary relations. This emergence has been gathering momentum since the 60's with the advent of the New Age consciousness and with increasing interest in energetic and vibrational forms of bodywork. But it is rooted in the true Piscean ideal exemplified by Jesus Christ and also the prophet Mohammed. It is bizarre, truly, truly bizarre, that in the name of two of the most gentlest, kindest and wisest males ever to incarnate on planet earth, that many of their followers are intent on blowing the hell out of anyone who disagrees with their interpretation of their teachings.

Both Jesus and Mohammed are realized God Beings which is the true and full human birthright and expression. And this realization of the God Within All is the essence of their teachings and their lives. This is what needs to come forth and is coming forth. The realization of your source as a Being of Limitless Love and Light is actually and simply good medicine for personal and planetary consciousness and is the central purpose, especially if you are reading this message or other's like it, of birth on the planet at this time.

The ancient term for the incorporation of the Christ Consciousness is Theophagy, a *widely spread practice in the ancient world of eating the body of the deity.* At the Last Supper, when Jesus invited his followers *to eat my flesh and drink my blood and do this in memory of me,* it was the phenomenon of Theophagy that he was referring to. Uranus also rules power plants, such as hallucinogen and psychedelics, which came into widespread use among the counter culture during the 60's. Recently they have been renamed as *entheogens* which means *the god within,* a term congruent with that of Theophagia, which is naturally why many cultures have made use of these substances.

Please understand that I am not necessarily recommending or advocating the use of entheogens but I am advocating and recommending the reception of energetic and vibrational forms of bodywork. The incorporation of Limitless Love and Light into the physical body is the essence of energetic and vibrational healing practiced by thousands of healers world wide. It is not by happenstance that there are so many gifted and dedicated bodyworks presently incarnated on the planet.

In the late 70's, while practicing a Hindu mantric form of meditation, I had a spontaneous, radical and completely unexpected Awakening and Realization of the

Christ Consciousness. This came totally out of the blue, which is a perfect example of how Uranus works. Since then, this experience has appeared again and again, mostly in meditation and in my vibrational healing practice but also during my daily activities. Again this is by no means peculiar to me nor does it make me special in any way. It should be emphasized that this is a completely natural and organic occurrence that is happening world wide.

When I first began my healing practice in the late 80's, this expression of Limitless Love and Light would arise again and again in my clients, most of whom are female. This came as a shock to me as I thought the only way for ecstasy to arise, or for a vibrational quickening to occur, was through long extended periods of meditation. Yet here it was happening on the fly with women who had not practiced meditation for any significant period of time. I'll write more about this phenomenon in future writings of Chiron and the Sacred Feminine. The point here is that this quality of Love and Light can be found everywhere and in everyone.

Besides the Emergence of the Christ Consciousness, there are other prophecies and visions that express the same idea or occurrence. I'll briefly discuss two. These are excerpts from a book I am writing currently entitled *The Evolution of the Body's Consciousness*. The first is from the Mayan Cosmology based on a sophisticated galactic Calendric system, which culminates at the sunrise of the winter equinox at 12.21.2012. This date represents an extremely close conjunction of the Winter Solstice Sun with the crossing point of the Galactic Equator, the Equator of the Milky Way and the Ecliptic, the path of the Sun.

And so, here we are, currently living the last six years of both a 5,125 year Creation Cycle and of a 26,000 Grand Cycle! *'Many peoples spoke of these last days of the Great Cycle, including the Maya, Hopi, Egyptians, Kabbalists, Essenes, Qero elders of Peru, Navajo, Cherokee, Apache, the Iroquois confederacy, Dogon Tribe of North Africa, and Aborigines of Australia. This time we are now in has been called 'The Time of Trial on Earth, Judgment Day, The Time of Great Purification, The End of this Creation, The Quickening, The End of Time as We Know It, and The Shift of the Ages'.*

([www.13moon.com/prophecy%20page.htm](http://www.13moon.com/prophecy%20page.htm)

<<http://www.13moon.com/prophecy%20page.htm>> )

Since 1992 the earth's core frequency has increased from 7.2 cps to currently over 11 cps. The fact that it is changing at all is a mystery to scientific minds, as 7.2 cps was considered to be an immutable reality of earth life. Curiously this shift coincided with the last katun, a twenty-year period in Mayan cosmology, which began in 1992. It is foretold that the completion of the precession of the equinoxes scheduled for 12.21.2012 brings regeneration of Earth, offering awakening to all open, willing hearts. It is speculated that the new frequency will be established at 13 cps. This foretells of a transformational shift in the cellular frequency of the human body.

The second excerpt pertains to the visions of Sri Aurobindo and The Mother, whose combined work points toward the current process of the Divinization of the Physical Body; in other words the emergence of a race of *Descended Masters*.

*"When the physical body is thoroughly divinized, it will feel as if it were always walking on air; there will be no heaviness or tamas or unconsciousness in it. There will be no end to its power of adaptability: in whatever conditions it is placed, it will immediately be equal to the demands made upon it. Plasticity will enable it to stand the attack of every hostile force... it will present no dull resistance to the attack but will be, on the contrary, so pliant as to nullify the force. Lastly, it will be turned into the stuff of light. Not only those who are developed enough to have their subtle sight open, but the ordinary man too will be able to perceive this luminosity. It will be an evident fact to each and all, a permanent proof of the transformation which will convince even the most skeptical."* The Mother

A third perspective that further illuminates the subject, and that is in alignment with the Christ Consciousness, the Mayan Prophecies, and the Divinization of the Body, is that of Quantum Medicine, which views the body from as a cellular/molecular matrix of light. In the words of David Bohm, a Nobel prize winning physicist, *"All matter is trapped light."* With the advent of Quantum medicine we are witnessing a merger between science, prophecy and spirituality.

As with the Middle East activation by Uranus in Pisces, the activation of the Light Body within the individual will bring the unconscious to the surface. When I first began my healing practice, I naively believed that all that needed to occur was the opening of the chakra/energy centers. I was unprepared for all the buried and past traumas to become activated as well. For this reason, I also encourage a somatic approach and understanding of the body; i.e. releasing and dissolving the personal history, stored in the character and body armoring. This also includes the ancestral memories of dysfunction and unconscious that have been passed down the ages as the saying from the Bible suggests. *The sins of the father (parents) are visited upon the sons (the children.)*

Uranian energy is about freedom. Jesus once said *"Know the truth and the truth shall set you free."* But it is not freedom to do whatever one pleases or chooses, which was rife during the 60's and is rampant in the Middle East. It is freedom from the known and a freedom to be completely yourself, unrestricted by ignorance and the binding inertia of the past. Uranus is better thought of as Prometheus of ancient Greek mythology, who stole fire from the Gods and gave the gift of language to mortal beings. The challenge of Uranus then is to receive a vision of radical awakening and transformation and bring that to the collective.

With Uranus in Pisces the invitation is that it is time to go home, to return to Source and to become the Christed Beings of Limitless Love and Light that is our birthright. The more people engaged in Awakening their Light Body and their Visions through any of the above practices, prophecies and visions, or others such as the attainment of the Rainbow Body, the luminous Body of Light of Shamanism, or the cultivation of the Body of Light, the Sambogakaya, of Buddhism, serve the whole of humanity. They are the harbingers and forerunners of a new race of human beings, ones fully and consciously invested with Love and Light. It is happening right here and right now. All

you need to do is be willing, open and receptive to the evolutionary process of the transformation of the physical body.

**Francis X Caulfield**, a life-long student and practitioner of Astrology, offers a **holistic vision to astrological divination and counseling**. He reads the natal chart as a **transformational blueprint** of the **Self**, impeccably informed with **celestial guidance and insight**. He eloquently blends intuition with modern and ancient astrological expertise forming a multi-layered, comprehensive understanding of each client's distinct **life purpose, potential, and direction**.

Francis is a talented **vibrational healer/bodyworker** with over 15 years experience in private practice and 30 plus years of meditation practice. His work is an intuitive blend of **Somatic, Energetic, and Shamanic** bodyworks for **Spiritual Awakening, Personal Transformation, and Holistic Healing**.

Francis also conducts group and individual **Remote Healings, Sacred Sound Ceremonies, Toning Workshops**, and programs in **Energy Medicine Circles**, and the **Illumination of the Body**.
